

RISE

By  MoxiWorks

Just Listed

Automatically Promote Every New Listing

What It Does

RISE automatically emails your contacts whenever you get a new listing. Set it once and your listing marketing keeps running in the background.

Why It Matters

- Stay top of mind automatically
- Save time on manual marketing
- Promote listings faster
- Keep your database engaged

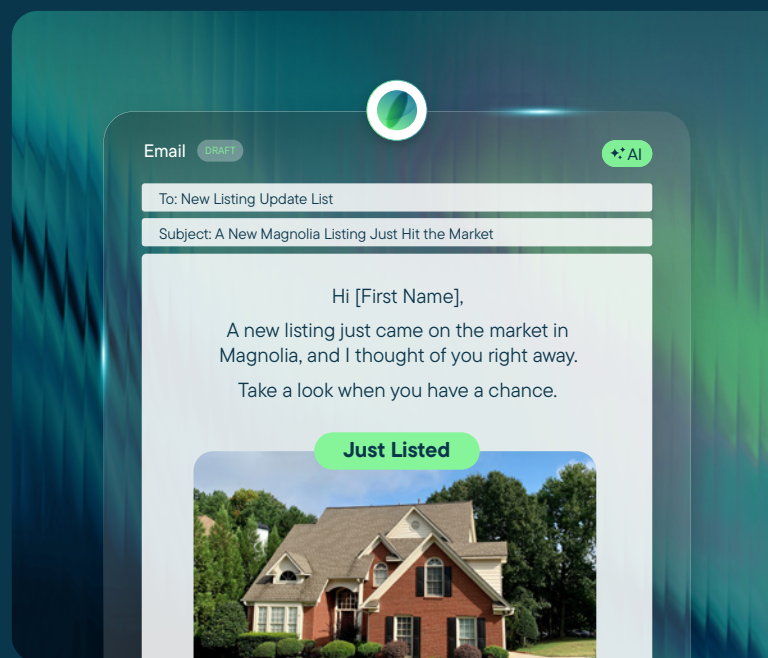

Before You Start

Make sure your MLS is connected to RISE

Common Question

“Why didn’t it send immediately?”

Just Listed is trigger-based and sends when a new listing is detected.

Quick Setup

1. Go to Campaigns > Create Campaign > Search for the pre-built Just Listed Campaign
2. Choose your audience: We recommend sending to all contacts
3. Set your trigger settings
4. Click Start

That’s it. RISE automatically sends listing emails whenever you have a qualifying new listing.
