RISE

By MoxiWorks

Just Sold

Turn Every Closing Into Your Next Listing.

What It Does

RISE automatically emails your contacts whenever one of your listings sells. Set it once and it runs in the background.

Why It Matters

- Show proof of your results
- Stay top of mind automatically
- Spark referrals from your sphere
- Save time on manual marketing

Before You Start

Make sure your MLS is connected to RISE. Trigger availability depends on MLS coverage in your market.

Quick Setup

1. Go to Campaigns > Create Campaign > Select the pre-built Just Sold campaign
2. Choose your audience: all contacts, or narrow it with SmartGroups or tags
3. Set your trigger settings, including property type
4. Click Start

That's it. RISE sends a Just Sold email whenever one of your listings sells.

Good to know: Recipients aren't matched to the property. Your audience decides who gets it, because even contacts who aren't searching may know someone who is.

Common Question

"Why didn't it send the moment my listing sold?"

RISE checks for sold listings about every hour, then sends to your campaign audience.
